Table of Contents

1. Introduction – It Isn't as Hard as You Think
2. The Math of \$30,000 Passive Income
3. Mindset Matters: Patience + Consistency
4. Building Wealth Through Growth Shares & Blue Chips
5. Dividend Investing the Easy Way
6. Digital Products & Online Stores
7. Affiliate Marketing
8. Print-on-Demand & Creative Assets
9. The 4-Step Framework
10. Your First \$500/Month – Quick Wins
11. Avoiding Mistakes
12. Case Studies
13. Action Plan – 12-Month Roadmap
14. Tools & Platforms You'll Need
15. The Easy Way Mindset – Keep It Simple
16. Appendix A – Quick Start Checklist
17. Appendix B – 12-Month Roadmap
18. Appendix C – Passive Income Calculator (Worked Examples)
19. Bonus – 20 Tools with Mini-Reviews
20. Bonus – 30-Day Passive Income Challenge
21. Bonus – 100 Niches & Micro-Ideas

22. Thank You for Reading

Introduction – It Isn't as Hard as You Think

Why simplicity wins: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Why simplicity wins: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Why simplicity wins: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Why simplicity wins: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Why simplicity wins: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Systems vs. one-offs: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Systems vs. one-offs: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and

contributing capital. Compounding turns small, boring actions into durable outcomes.
Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday.
Document SOPs and reuse templates so energy goes into value, not setup.

Systems vs. one-offs: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.
Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday.
Document SOPs and reuse templates so energy goes into value, not setup.

Systems vs. one-offs: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.
Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday.
Document SOPs and reuse templates so energy goes into value, not setup.

Systems vs. one-offs: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.
Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday.
Document SOPs and reuse templates so energy goes into value, not setup.

Compounding behaviors: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.
Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday.
Document SOPs and reuse templates so energy goes into value, not setup.

Compounding behaviors: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.
Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday.
Document SOPs and reuse templates so energy goes into value, not setup.

Compounding behaviors: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.
Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday.
Document SOPs and reuse templates so energy goes into value, not setup.

Compounding behaviors: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and

contributing capital. Compounding turns small, boring actions into durable outcomes.

Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday.

Document SOPs and reuse templates so energy goes into value, not setup.

Compounding behaviors: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.

Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday.

Document SOPs and reuse templates so energy goes into value, not setup.

Foolish Takeaway: Keep systems simple, inputs consistent, and reinvest early.

Case Study — Focused Operator: A 10-month journey focused on hybrid (dividends + digital).

Month 1: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 2: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 3: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 4: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 5: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 6: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 7: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 8: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 9: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 10: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Lessons: inputs compound, reinvest early profits, remove bottlenecks, and keep the playbook boring-and-effective.

The Math of \$30,000 Passive Income

\$83/day model: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

\$83/day model: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. The 4-Step Framework

Build base: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Build base: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Build base: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Build base: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Build base: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Create scalable assets: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Create scalable assets: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.

Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Create scalable assets: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.

Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Create scalable assets: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.

Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Create scalable assets: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.

Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Automate & reinvest: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.

Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Automate & reinvest: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.

Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Automate & reinvest: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.

Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Automate & reinvest: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.

Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Automate & reinvest: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes.

Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Transition: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Transition: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Transition: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Transition: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Month 7: Shipped 4 content assets, improved 2 listings, invested \$800. Traffic and conversions nudged upward. Month 8: Shipped 4 content assets, improved 2 listings, invested \$800. Traffic and conversions nudged upward. Month 9: Shipped 4 content assets, improved 2 listings, invested \$800. Traffic and conversions nudged upward. Month 10: Shipped 4 content assets, improved 2 listings, invested \$800. Traffic and conversions nudged upward. Lessons: inputs compound, reinvest early profits, remove bottlenecks, and keep the playbook boring-and-effective.

Your First \$500/Month – Quick Wins

One product plan: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

One product plan: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

One product plan: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Case Study — Focused Operator: A 10-month journey focused on hybrid (dividends + digital).

Month 1: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 2: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 3: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 4: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 5: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 6: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 7: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 8: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 9: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Month 10: Shipped 4 content assets, improved 2 listings, invested \$300. Traffic and conversions nudged upward. Lessons: inputs compound, reinvest early profits, remove bottlenecks, and keep the playbook boring-and-effective.

The Easy Way Mindset – Keep It Simple

Small set of plays: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Small set of plays: Build around simple, repeatable systems. Define your target, keep moving parts low, and measure weekly inputs—publishing, improving listings, and contributing capital. Compounding turns small, boring actions into durable outcomes. Example: run a weekly cadence—plan Monday, produce Tue–Thu, publish Friday, review Sunday. Document SOPs and reuse templates so energy goes into value, not setup.

Lessons: inputs compound, reinvest early profits, remove bottlenecks, and keep the playbook boring-and-effective.

Appendix A – Quick Start Checklist

- Pick a primary stream + one supporting stream
- Reverse-engineer \$83/day
- Ship MVP in 14 days
- Capture emails + weekly newsletter
- Reinvest early profits into visuals or DRIP

Appendix B – 12-Month Roadmap

- Q1: Niche, MVP, first visitors/customers
- Q2: Optimize offers, add upsells/bundles, weekly content
- Q3: Second scalable asset; automate newsletters
- Q4: Review KPIs, tilt to dividends, next-year targets

Appendix C – Passive Income Calculator (Worked Examples)

- Dividend path: 5% blended yield → capital requirement math, accumulation schedule, DRIP example with milestones.
- Digital products path: pricing × volume → launch plan, traffic sources, conversion targets, and upsell ideas.
- Hybrid path: blend portfolio income with digital/affiliate to smooth volatility and

accelerate progress.

Bonus – 20 Tools with Mini-Reviews

- Tool #1: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #2: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #3: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #4: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #5: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #6: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #7: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #8: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #9: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #10: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #11: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #12: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #13: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #14: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #15: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #16: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #17: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #18: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.

- Tool #19: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.
- Tool #20: purpose, ideal use case, one pro, one con, and a quick-start tip for beginners.

Bonus – 30-Day Passive Income Challenge

- Day 1: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 2: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 3: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 4: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 5: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 6: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 7: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 8: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 9: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 10: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 11: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 12: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 13: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 14: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 15: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 16: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 17: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 18: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 19: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 20: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 21: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 22: a 5–20 minute action that compounds, with a concrete example and a checkpoint.

- Day 23: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 24: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 25: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 26: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 27: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 28: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 29: a 5–20 minute action that compounds, with a concrete example and a checkpoint.
- Day 30: a 5–20 minute action that compounds, with a concrete example and a checkpoint.

Bonus – 100 Niches & Micro-Ideas

- 1. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 2. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 3. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 4. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 5. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 6. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 7. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 8. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 9. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 10. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.

- 11. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 12. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 13. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 14. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 15. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 16. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 17. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 18. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
- 19. Micro-idea: narrow audience + specific problem + simple outcome. Include an example deliverable and a quick monetization path.
