What Are Digital Products?

A digital product is a product that exists only in digital form. It can be downloaded or streamed, and does not have a physical form.

When purchased, it can be set up to be automatically emailed to your customer, so you don't have to do anything to fulfil the order.

This makes it the perfect way to create a passive income stream.

Everyone comes with their own expertise and knowledge - and there are people out there who want to learn from you!

Digital products can be anything from ebooks and logos to courses and templates (many of which you have automatic access to download right now in your Digital Wealth Vault!)

Examples of Digital Products

Here are some examples of digital products you can sell online to make passive profit:

- E-books: Written content on various topics, often in PDF
- Online Courses: Learning programs that can include videos, quizzes, audios and worksheets
- Templates: Ready-made designs or documents for planners, journals, lessons, resumes, etc
- Graphics and Design Elements: Digital assets like logos, icons, fonts, and stock photos
- Digital Art: Original art pieces, illustrations, or graphics
- Membership Sites: Exclusive access to content or communities for paying members
- Coaching: 1:1 or group coaching
- And so much more!

Why Sell Digital Products?

- Low start-up costs: Selling digital products doesn't require you to buy inventory or rent a storefront. All you need is a computer and an internet connection from anywhere
- Ability to work from home: This is a game-change having the ability to both create and sell from anywhere!
- Global reach: Digital products can be sold to people all over the world. This means you can reach and impact a much larger audience than you could with a physical product.
- Passion + Profit: It allows you to transform your expertise and enthusiasm into a profit, reaching a global audience while doing what you love! Win, win!
- Passive income: Once you create a digital product, you can continue to sell it for years to come. This means you can generate passive income, even if you're not actively working on the product.

Having an online business is something I'm so grateful for everyday... Being able to work from anywhere, make an income and an impact! PLUS having that flexibility in my schedule is PRICELESS!

Choosing Your Niche

When choosing which digital products to start selling, ask yourself - “WHO AM I SELLING TO?”

Your audience will dictate which products you chose to sell. As you’ll see - there is a huge selection of digital products to download that you can rebrand and resell in a whole range of niches in the Digital Wealth Vault.

Here are some ideas to get you thinking....

- Beauty Product Reviews Blog

Sports and Fitness:

- Sports Nutrition eBook
- Fitness Training Program Online Course or Membership
- Workout Tracker/Food Journal Printable

Travel and Adventure:

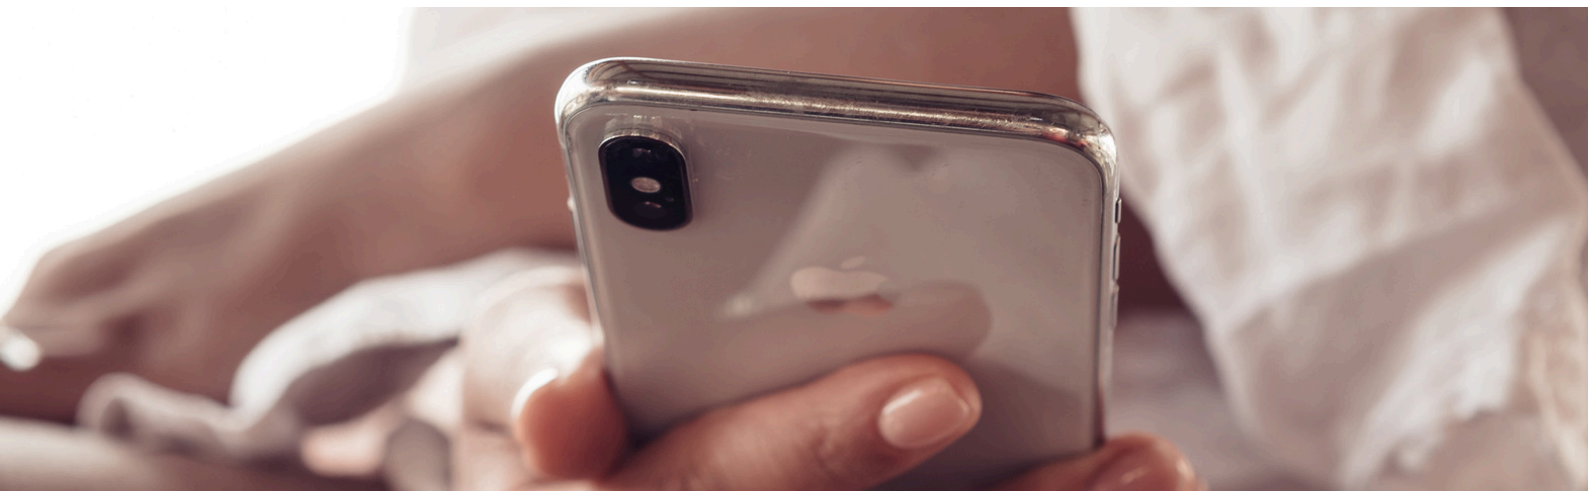

- Travel Guide eBook
- Travel Planning Spreadsheet
- Adventure Photography Online Course or Membership

Tools To Get You started

With the right tools it becomes pretty clear how you can create digital products and start making money online right away ...

CANVA - This is where you will be able to play around with and rebrand your digital products (plus social media content!)

I have been using Canva for years and it's just the best... In fact it's exactly where this ebook was created for you!) You also don't have to worry too much about design because there are also HUNDREDS of templates that you can use! Simply add YOUR knowledge to your downloads, or to Canvas templates - and make them your own! If your new to Canva I have a whole guide I'm happy to gift you for your own personal use - you can access it [by clicking here!](#)

SOCIAL MEDIA - Social media is a powerful tool for connecting with your ideal customer, engaging with your audience, and driving people to your products (all for free!)

Simply chose the platforms that align with your target audience and niche. Popular options include Instagram & TikTok. Then, set up your profiles using a consistent username and profile picture. Create content that hooks your audience & provides them value.

CREATING AN ONLINE STORE

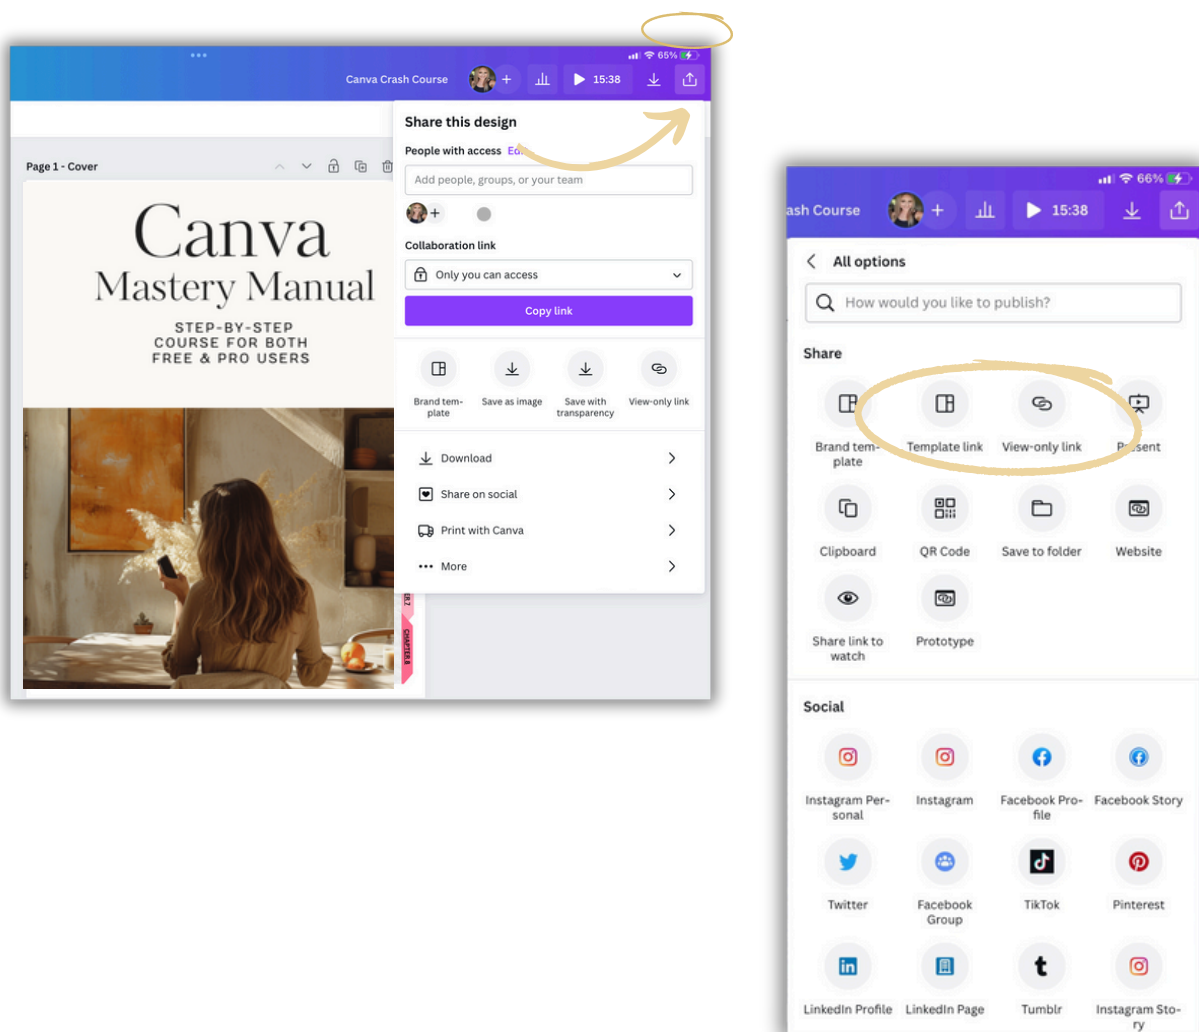

I personally love using Stan Store & Etsy.

I love Stan Store because it can be linked to my social media channels and because of it's simplicity and Etsy also, because of it's already built in audience.

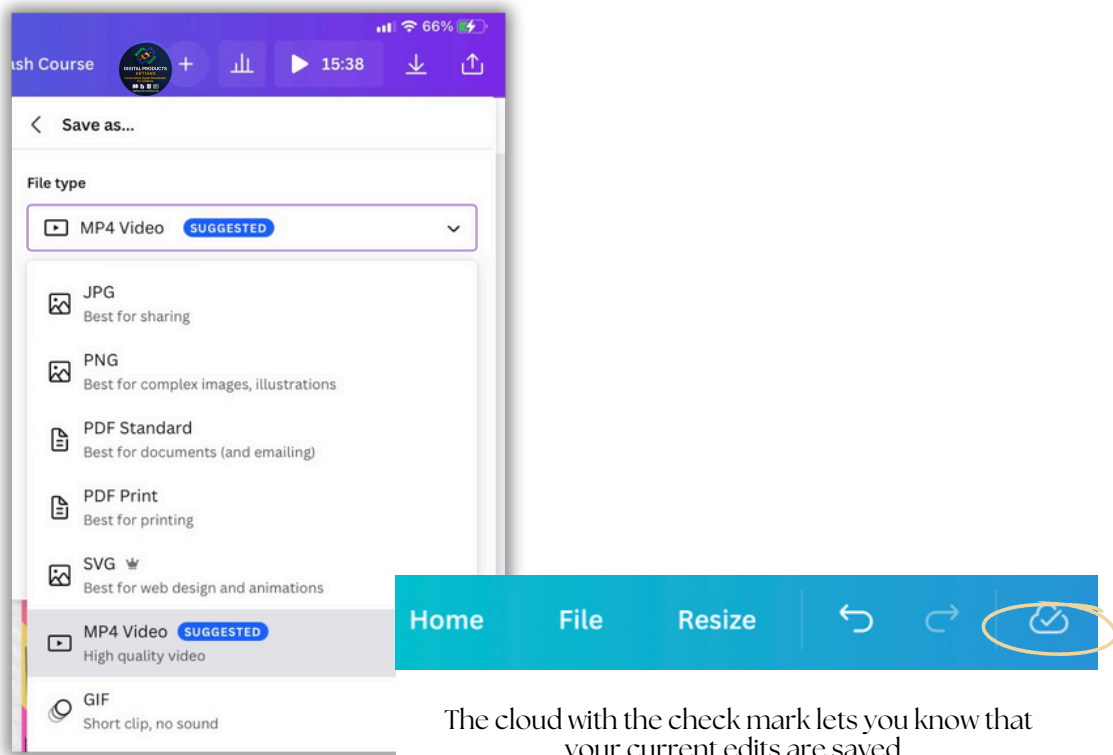

Saving and Sharing Your Projects

There are many different ways you can share and download your digital products from Canva to sell.

Use the up arrow in Canva the top right to see your options.

Saving and Sharing Your Projects

The cloud with the check mark lets you know that your current edits are saved.

- 1
 - TEMPLATE LINKS ARE LINKS THAT CAN BE OPENED AND EDITED BY ANY USER WITH THE LINK. THIS DOES NOT EDIT YOUR ORIGINAL DESIGN.
 - VIEW ONLY LINKS ALLOW USERS TO VIEW YOUR PROJECT BUT THEY CANNOT EDIT YOUR DESIGN.
- 2 WHEN DOWNLOADING & SAVING, CANVA WILL GIVE A SUGGESTED OPTION BASED ON THE CONTENTS OF YOUR DESIGN BUT YOU CAN CHOOSE ANY OPTION THAT IS BEST SUITED FOR YOU.
- 3 ALL YOU THEN NEED TO DO IS CREATE A PDF ON CANVA TO SHARE WITH YOUR CUSTOMERS THAT HAS THE LINK TO YOUR DIGITAL PRODUCT

Selling on Stan Store

Stan Store is an amazing one-stop-shop for your audience (this is what I use and love!)

It will hold all your content, downloads and sales for you. You will place a link in your social media bio which is where your audience can buy and download all of your digital products &/or services

Selling on Etsy

So you've got a knack for creating digital products—be it digital art, eBooks, or downloadable planners—and you're eyeing Etsy as your platform of choice. Brilliant! Contrary to the popular notion that Etsy is only a haven for handmade physical goods, it's also a bustling marketplace for digital downloads.

With its expansive user base and reputation for hosting unique, quality items, Etsy provides a golden opportunity to monetise your digital creativity without the fuss of shipping logistics.

Why Etsy for digital products, you ask?

Well, the platform offers instant downloads, meaning your customers get immediate access to the product, and you get paid just as quickly. Plus, Etsy's search algorithms are increasingly favourable to digital listings, making it easier than ever to get your digital goods in front of the right audience.

So, if you are ready to turn those digital products into profits - it's time to choose your digital product, rebrand (if you choose), create an online store front & upload it to launch!

Launching your Digital Products

You've made it to the launching section, which means IT'S GO TIME!

- Once you've confirmed that your products, your online store and your social media are all functioning and set up correctly, you will want to officially launch your product and start promoting it.
- Create hype in your Stories and posts! Take screenshots of new sales or give updates on what's happening throughout the launch (and of course, you can KEEP doing this even AFTER the launch ends as well!).

Here are some fun things you can do to boost sales with your launch:

- Offer a launch promo or special "launch pricing." You can offer this to your audience for a week or so and promote it on both IG and in your freebie emails. Just remember to go back through those emails after the launch promo ends to take out the sections where you are mentioning it!

- Do a short PRE-LAUNCH where you start hinting on your IG that something new and awesome is coming. Create a countdown. Invite people to DM you for that freebie if it's already ready. Stir up hype!
- Share a freebie! Even if people aren't ready to buy now, you can still get them on your email list by offering a freebie and nurture them until they're ready to buy over time.
- Share what you are doing on your other social media platforms, or with family and friends who can support you. If you're not comfortable sharing straight away with family and friends, then don't. Just do whatever feels most comfortable for you.

And if you're nervous about not getting engagement, don't be afraid to just ask. This can look like sending a message to a few trustworthy people that says, "Hey, would you just hit the like button or post a quick comment on any posts you see me post this week? I'm excited & nervous about this new biz, and could definitely use the support!"

Lastly, HAVE FUN! Be yourself. Be authentic. You don't have to see the whole staircase, you just have to take the first step! And plan to celebrate in some way, *no matter what.*

I am so excited for you!
